13. ABSTRACT (Maximum 200 words)

The AFOSR grant provided travel funds for a group of American engineers and scientists who gave invited lectures at the FENOMECH '81 symposium, which represented the second international conference on finite elements in nonlinear mechanics held by West Germany during August 25-28, 1981. Nearly 5000 distinguished scientists representing 2 countries and four continents gathered to attend 24 main lectures and 20 submitted shorter contributions on nonlinear mechanics. The papers covered recent developments in the theory and practice of finite element methods for solids, structures, fluids, and thermodynamics. A lively and fruitful exchange of information took place between participants and lecturers. The meeting resulted in three special issues of the journal, Computer Methods in Applied Mechanics and Engineering, and was also published separately by the North-Holland Publishing Company, Amsterdam in a book entitled FENOMECH '81, and edited by J.S. Doltsinis, K Straub, and K J Willam.

*Elements of U.S. Delegation to Finite
Elements in Nonlinear Mechanics (FENOMECH)*

Final Conference ...

to U.S. AIR FORCE OFFICE OF SCIENTIFIC RESEARCH

Contract AFOSR-81-0237

AFOSR.IX. 9-1640

The AFOSR provided travel expenses for a group of American engineers and scientists who gave invited lectures at the FENOMECH '81 symposium, which represented the second international conference on finite elements in nonlinear mechanics to be held by West Germany during August 25-28, 1981. Nearly 500 distinguished scientists representing 20 countries and four continents gathered to attend 24 main lectures and 20 submitted shorter contributions on nonlinear mechanics. The papers covered recent developments in the theory and practice of finite element methods for solids, structures, fluids, and thermodynamics. A lively and fruitful exchange of information took place between participants and lecturers. The meeting resulted in three special issues of the journal, Computer Methods in Applied Mechanics and Engineering, and was also published separately by the North-Holland Publishing Company, Amsterdam in a book entitled FENOMECH '81, and edited by J.S. Dolsinis, K. Straub, and K.J. Willam. This voluminous collection of papers, totalling over 1100 pages, is divided into three major parts. In Part I, there are four papers on computational mechanics of solids and fluids, three papers on stability analysis and four papers on buckling and post-buckling. Part II includes four papers on finite deformation elasto-plasticity, three papers on plastic structures, three on inelastic problems, and four on fluid structure interaction. Part III includes two papers on general numerical methods, four on contact problems, three on computational techniques, two on plates and shells, and an additional five on nonlinear applications.

~~Approved for public release
distribution unlimited~~

There is probably no work published in the last five years that has a more impressive and useful collection of papers or which represents better the current state of the art in finite element analysis. Special mention is made of the support from the U.S. Air Force Office of Scientific Research, and without this support, this important meeting would not have been the success it definitely was.

Organizers of the meeting were John H. Argyris, University of Stuttgart, T.J.R. Hughes, Stanford University, J.T. Oden, University of Texas, K.S. Pister, University of California, and the late K. Washizu, University of Tokyo.

A list of participants at the meeting is attached. Also attached is a copy of the cover page of the Proceedings and a copy of the Table of Contents.

FENOMECH '81

Proceedings of the 2nd International Conference on
Finite Elements in Nonlinear Mechanics

August 25-28, 1981

Edited by
J. St. Doltsinis
K. Straub
K. J. Willam

1982

NORTH-HOLLAND PUBLISHING COMPANY
AMSTERDAM, NEW YORK, OXFORD

TABLE OF CONTENTS

Preface	v
Part I	
CHAPTER I. COMPUTATIONAL MECHANICS OF SOLIDS AND FLUIDS	
Recent natural formulations in nonlinear mechanics <i>J.H. Argyris, J.S. Dolsinis, K. Straub, P. M. Pimenta, Sp. Symeonidis and H. Wüstenberg</i>	2
Modelling of continuum mechanics problems with large deformations <i>V.M. Fomin, V.P. Shapeev and N.N. Yanenko</i>	157
Streamline upwind/Petrov-Galerkin formulations for convection dominated flows with particular emphasis on the incompressible Navier-Stokes equations <i>A.N. Brooks and T.J.R. Hughes</i>	199
On current aspects of finite element computational fluid mechanics for turbulent flows <i>A.J. Baker</i>	261
CHAPTER II. STABILITY ANALYSIS	
A formulation and solution procedure for post-buckling of thin-walled structures <i>T. Yoshida, T. Nomura and N. Masuda</i>	285
Large deflection and post-buckling analysis of shell structures <i>T.Y. Chang and K. Sawamiphakdi</i>	311
CHAPTER III. BUCKLING AND POST-BUCKLING	
Stability and postbuckling analysis of nonlinear structures <i>E. Cenov and G. Sander</i>	329
A creep type strategy used for tracing the load path in elastoplastic post-buckling analysis <i>B.-H. Kröplin and D. Dinkler</i>	365
On nonlinear membrane theory <i>Ph. Destuynder</i>	377
On the energy criterion in the context of plate stability <i>H.H.E. Leipholz</i>	401

Part II**CHAPTER IV. FINITE DEFORMATION ELASTO-PLASTICITY**

Nonlinear matrices, their implications and applications in inelastic large deformation analysis

Y. Yamada

417

On the numerical implementation of inelastic time dependent and time independent, finite strain constitutive equations in structural mechanics

S.W. Key and R.D. Krieg

439

Different finite element approaches to large plastic deformations

O. Mahrenholz

453

On the implementation of inelastic constitutive equations with special reference to large deformation problems

J.C. Nagtegaal

469

CHAPTER V. PLASTIC STRUCTURES

Studies on plastic structures: stability, anisotropic hardening, cyclic loads

M. Kleiber, J. A. König and A. Sawczuk

487

Yield surface applications in nonlinear steel frame analysis

J.G. Orbison, W. McGuire and J.F. Abel

557

A variational principle and an algorithm for limit analysis of beams and plates

W.H. Yang

575

CHAPTER VI. INELASTIC PROBLEMS

Accelerated solution techniques and concrete cracking

M.A. Crisfield

585

One-dimensional finite element analysis of thermal ablation with pyrolysis

M. Hodge and P. Gerrekens

609

Computational aspects of welding stress analysis

J.H. Argyris, J. Scimma and K.J. Willam

635

CHAPTER VII. FLUID-STRUCTURE INTERACTION

Finite element methods with user-controlled meshes for fluid-structure interaction

T. Belytschko, D.P. Flanagan and J.M. Kennedy

669

An arbitrary Lagrangian-Eulerian finite element method for transient dynamic fluid-structure interactions

J. Donea, S. Giuliani and J.P. Halleux

689

Recent developments in large-scale finite element Lagrangian hydrocode technology

G.L. Goudreau and J.O. Hallquist

725

Table of Contents

ix

- Large deformation inelastic analysis of impact for shipping casks
C.M. Charman, R.M. Grenier and R.E. Nickell

759

Part III**CHAPTER VIII. NUMERICAL METHODS**

- A fast pseudo-time integration scheme for the solution of the steady transonic flow problem
H.O. Yurtsseven, C. Karaca and A. Ecer

787

- An energy balancing method for large displacement analysis of structures
R. Schilder

801

CHAPTER IX. CONTACT PROBLEMS

- A numerical analysis of a class of contact problems with friction in elastostatics
L.T. Campos, J.T. Oden and N. Kikuchi

821

- Computation of the dynamic response of structures with unilateral constraints
(contact) - comparison with experimental results

D. Osmont

847

- Calculation of impact-contact problems of thin elastic shells taking into account
geometrical nonlinearities within the contact region

E. Stein and P. Wriggers

861

- Nonlinear dynamic analysis of submerged pipelines
E. Mollestad and P.G. Bergan

881

CHAPTER X. COMPUTATIONAL TECHNIQUES

- Computational error estimates and adaptive processes for some nonlinear structural
problems

I. Babuška and W.C. Rheinboldt

895

- Solution of nonlinear structural problems using array processors
N. Sarigul, J. Maitan and H.A. Kamel

939

- On making large nonlinear problems small
A.K. Noor

955

CHAPTER XI. SHELLS AND FLATES

- Nonlinear analysis of elasto-plastic shells by hybrid stress finite elements
O.M. Eidsheim and P.K. Larsen

989

- Finite element analysis of plates with nonlinear properties
D. Harrison, T.J.W. Ward and J.R. Whiteman

1019

Table of Contents

CHAPTER XII. NONLINEAR APPLICATIONS

Computer graphics displays of nonlinear calculations <i>H.N. Christiansen and S.E. Benzler</i>	1037
A simple finite element for elastic-plastic deformations of shells <i>D. Tsalasidis and G. Wempner</i>	1051
Tube collapse analysis using finite elements <i>A. Ricard</i>	1065
Non-linear analysis of prestressed plates <i>G. Swoboda and O. Neuner</i>	1073
The plastic node method: A new method of plastic analysis <i>Y. Ueda and T. Yao</i>	1089
Author Index	1105
